**BECAUSE STARS ALWAYS SHINE  
BRIGHTER IN THE DESERT.**

**Humble luxury.**

Luxury is taking the time to craft the best product possible, without external pressure. It's surrounding ourselves with people we love to work with. It's respecting and honouring years of craftsmanship and enabling it to stay alive. And above all, luxury is not taking yourself too seriously, having fun.

We believe in emotional & long-lasting products. At Parachilna, we take the observer seat and let designers, materials and craftsmen work their magic.

**Human-made.**

Our lamps and most of our components are assembled and made by cutting edge technology machines: humans. There's someone that took out the ceramic from the mould, someone that blew the glass and someone that mounted the lamp and packed it.

All those persons imprint their energy in each fixture. That makes them unique and one of a kind. We believe that human-made is the best made!

**BCN born & raised.**

We are based in Barcelona, city with a great design heritage. It's where Spanish design and many groundbreaking architects were born. We feel inspired by this history and strive to leave our mark.

Our headquarters are located in Colonia Güell's industrial area. The layout was made by Antoni Gaudí. During its golden age, it was a textile factory that employed more than 1.200. Today, a lot of the buildings are falling apart, but they keep their soul. There's a special energy in the space that is certainly infused in Parachilna's lamps.

*Because all deserts can be crossed.*

*Because all trains stop even if  
there is no railway station.*

*Because you do not need much to  
build up a town or your own dreams.*

*Because stars always shine  
brighter in the desert.*

And above all,  
luxury is not taking  
yourself too seriously,  
having fun.

At Parachilna,  
we take the observer  
seat and let designers,  
materials and craftsmen  
work their magic.

Its name means ghost in chinese.  
Makes sense when you look at it, right?  
Made from hand-molded acrylic.

**“Inspired by the idea that light itself could be harnessed and manipulated to create a physical sculpture, we developed a design that alters light at its source”**

Twist it, turn it, rotate it in whichever way you want. No matter the position, it always maintains itself in perfect balance. The name comes from a style of classical Japanese swordsmanship mainly known for the use of two katanas.

**“Nitō is a sketch  
thrown into space.  
Each of its  
movements creates  
a new form,  
a different light -  
always maintaining  
perfect balance”**
